About Me

- **Professional Summary:** I am a dedicated BICT(Hons) student at the University of Vavuniya, balancing rigorous academic studies with practical teaching experience. As a tutor for the Sri Lankan A/L Technology stream, I excel at communicating complex technological principles effectively. I am highly motivated to bridge the gap between education and practical software solutions.
- **Interests:** Software Development, Educational Technology, Continuous Learning, Mentoring.
- **Career Objective:** To secure a challenging role in the IT industry where I can leverage my technical background and communication skills to develop impactful solutions, while continuing to grow as a tech professional.

Education

- **Degree:** Bachelor of Information and Communication Technology Honors (BICT(Hons))
- **Diploma:** - Diploma in English at DMI Kilinochi Campus
- **Institution:** University of Vavuniya, Sri Lanka
- **Relevant Coursework:** [Insert subjects, e.g., Programming Fundamentals, Database Systems, Web Development]
- **Academic Highlights:** [Insert Dean's List, high GPA, or specific academic achievements]

Skills

Technical Skills:

Programming Languages: Java, HTML5, CSS3, Python, JavaScript, C# (.NET Framework), PHP, MySQL
Technologies/Frameworks: React.js, Node.js, Next.js, Figma, WordPress Database: My SQL, Mongo DB
Developer Tools: Visual Studio, IntelliJ IDEA, Arduino IDE, Figma, GitHub

Soft Skills:

- Public Speaking and Instruction
- Mentoring and Leadership
- Analytical Problem Solving
- Time Management

Projects

1. [Insert Project Title, e.g., Student Management System]

- **Problem:** [e.g., Needed a streamlined way to track student attendance and grades]
- **Contribution:** [e.g., Developed the backend database architecture and user authentication]
- **Tools:** [e.g., Python, SQLite, Flask]
- **Links/Screenshots:** [Insert GitHub Link] | [Insert Placeholder for Screenshot]

2. [Insert Project Title]

- **Problem:** [Smart dustbin system]
- **Contribution:** [Designed and assembled the hardware prototype, integrating an ultrasonic sensor for waste-level detection and a servo motor for automated lid operation. Developed and flashed the embedded C/C++ firmware to process sensor data in real-time, optimizing the system for low power consumption.]
- **Tools:** [LED light, Arduino Uno / ESP32, Arduino IDE, C/C++, Ultrasonic Sensor (HC-SR04), Servo Motor, Breadboard & Jumper Wires, Gps module]
- **Links/Screenshots:** [Insert GitHub Link] | [Insert Placeholder for Screenshot]

3. [Insert Project Title]

- **Problem:** [Briefly describe the challenge]
- **Contribution:** [Detail your specific role]
- **Tools:** [List the tech stack used]
- **Links/Screenshots:** [Insert GitHub Link] | [Insert Placeholder for Screenshot]

Experience & Activities

- **Science for Technology Tutor:** Mentoring and instructing students in the Sri Lanka A/L Technology Stream (Tamil Medium). Responsible for breaking down syllabus material, creating assessments, and guiding students toward academic success.
- **[Insert Role]:** [Add any university clubs, volunteering, hackathons, or leadership positions]

CV

- **Action:** [Insert Button/Link: "Download Professional CV (PDF)"]

Contact & Links

Area	Recommended options
Core development	HTML5, CSS3 and JavaScript
Styling — choose one	Plain CSS, Bootstrap or Tailwind CSS
Optional framework	React or another familiar front-end framework; use only if you can complete it confidently
Design	Figma, Canva or hand-drawn wireframes converted into a clear digital submission
	Version control Git and GitHub
